Make sure Bluetooth and Camera are both turned ON.

If Bluetooth is on and the app will not connect, reinstalling the app should correct the issue. On current iOS operating systems, hold down on the app icon and a menu will appear. Click on “remove app”. Then go to the app store and start a fresh installation.

On older operating systems, press and hold the app until the “-” symbol appears. Click on the “-” to delete the app. Go to the app store and start a fresh installation.
